

Title: Final Report- Cheerio Studio Website Design and Development

Name: Sam Daramroei Class: WDD130 Date: 21/07/2023

Introduction: The Cheerio Studio website was developed as part of an individual project to showcase my skills in web design and development. The website serves as an online platform to promote the services offered by Cheerio Studio, which specializes in providing custom web solutions to businesses and individuals. This report will detail the design and development process of the completed website, including the goals and objectives, design process, and key learnings.

Introducing the Subject of the Website: The Cheerio Studio website aims to introduce the studio's expertise in web design and development to potential clients. The website showcases a diverse portfolio of past projects, highlighting our capabilities in creating visually appealing and user-friendly websites. Additionally, the website provides information about the services offered, the team behind Cheerio Studio, and a contact page for interested clients to get in touch.

Explaining the Audience of the Website: The primary audience for the Cheerio Studio website includes entrepreneurs, small businesses, startups, and individuals seeking professional web design and development services. The website targets clients who value creativity, innovation, and personalized solutions to enhance their online presence and user experience. Additionally, the website is designed to engage potential partners and collaborators in the web design industry.

Website URL: The completed website for Cheerio Studio can be accessed at <https://cheerios-design.github.io/wdd130/cheerios-studio/index.html>.

Goals/Objectives: The main objective of this website is to effectively showcase my skills in web design and development to potential clients and industry peers. I hope to demonstrate my ability to create visually appealing and functional websites that align with clients' specific needs and brand identities. Through this website, I aim to attract new clients and establish Cheerio Studio as a reliable and creative web design agency.

Design Process: The design process for the Cheerio Studio website involved several key steps. I began by conducting research to understand current web design trends and user preferences. This research helped me identify the visual elements and layout that would resonate with the target audience. I then created wireframes and prototypes to outline the website's structure and user flow.

During the design phase, I focused on selecting a colour scheme and typography that reflected Cheerio Studio's brand identity. I wanted the website to convey a sense of creativity and professionalism, so I carefully chose imagery and graphics to complement the content. I ensured that the design was responsive and optimized for various devices to provide an optimal user experience.

Throughout the development process, I regularly tested the website for functionality, cross-browser compatibility, and responsiveness. I adjusted and refinements to ensure that the website met the highest standards in terms of design and performance that I could.

Conclusion: Completing this project has been a valuable learning experience for me as an aspiring web designer and developer. I have gained hands-on experience in creating a fully functional and visually appealing website from scratch. The project has enhanced my skills in web design principles, responsive design, and user experience optimization.

Moreover, I have learned the importance of effective communication through web design and how it can influence user engagement and conversions. This project has also taught me the significance of staying updated with the latest web design trends and technologies to deliver the best possible solutions to clients.

Overall, the Cheerio Studio website project has equipped me with the confidence and knowledge to take on more challenging web design projects in the future. I am excited to continue growing as a web designer and developer and look forward to applying these newfound skills in my professional journey.
